

25 October 2017.

Dear Big Bay Resident,

The rehabilitation of Big Bay beach will begin this week. The City of Cape Town finalised the appointment of the contractors yesterday, and its full steam ahead to complete the project by the 15<sup>th</sup> December before the holidays commence.

The project involves relocating the promenade 15m landward (thus reducing the lawn area), reconstructing the slope of the dune and creating a wider beach. A gabion structure will be built in front of the Lifesaving clubhouse to protect it from future storm surges.

The sketch below depicts how this necessary reconstruction of the beach will impact the beach walkway and reduce the Eden on the Bay lawn area.

The civils contractor is Burger Wallace, and the landscaping contractor is Vula Environmental.

The greater part of the lawn area will be closed during the construction period, and access to the beach will be restricted.
